

## MAKTEK FAIR IS NOW IN KONYA AFTER ISTANBUL AND IZMIR!

MAKTEK Fair, one of the world's largest metalworking fairs, opens in Konya after Istanbul and Izmir. Maktek Konya Fair, Machine Tools Industrialists and Businessmen Association (TIAD), Machinery Manufacturers Association (MIB) and Tüyap Konya Fairs Inc. in collaboration. In our country where production has gained great importance in the last period, MAKTEK Konya Fair will enable us to observe the last point reached in industrial manufacturing in Anatolia.

MAKTEK Konya Fair will be held for the first time in Konya Chamber of Commerce - Tüyap Konya International Fair Center on April 10-13, 2019, which is the most innovative meeting of metal processing in Anatolia. General Manager of Tüyap Konya Fairs Inc. İlhan Ersözlü said: " As our institution Tüyap Konya Fairs Inc. we will organize the MAKTEK Fair in Konya on April 10-13, 2019 by bringing the cooperation established with the Machine Tools Industrialists and Businessmen Association and Machinery Manufacturers Association to a new dimension. Our fair, which will contribute to the internal dynamics of the sector in Konya, will bring together many of the business people who will invest in the entire phase of production in Tüyap Konya with our participating companies to establish professional connections. With its continuously developing industry, the production base of Anatolia and the SME capital of our country, the power of the metal processing sector in the country's economy has become a pioneer in moving the brand trade fair, MAKTEK to the city. In this context, I hope that the fair will contribute to the national economy and the production of Anatolia.

Machinery manufacturing industry, which is the first in Konya's exports and has a positive effect on the industrial face of the city, has a share of approximately 22% in Konya's total exports. However Konya has 45% of the market in the metalworking field of Turkey. Bending, folding, flattening and flattening machines, scissor stands, machine tools, compressors and many industrial products which are widely produced in the city will be exhibited for domestic and foreign visitors at MAKTEK Konya Fair. The fair, which will be held in Konya Chamber of Commerce - Tüyap Konya International Fair Center on April 10-13, 2019, will enable the establishment of new collaborations for innovative meetings.
